Go on a 60-year ride with Harley-Davidson's Sportster Things got a little weird in the American motorcycle industry after World War II. People hungered for new motorcycles, buying just about everything manufacturers could build. But on rare occasions a manufacturer produced a machine that nobody wanted. Such was the case with the Harley-Davidson Model K. The Model K had most of the features buyers wanted in a modern machine, like hand-operated clutches, foot-operated shifters, and cool-running aluminum heads, but it lacked perhaps the most important technological upgrade: a modern overhead-valve valve-train design. The Model K retained the antiquated side-valve design because of arcane AMA racing rules written when Harley-Davidson and Indian

competed head-to-head on American racetracks, but by 1952 Indian was on its last legs. This should have made the Model K a massive sales success. What nobody counted on was the British bike invasion. Thanks to their modern overhead-valve engines, the lightweight British bikes humiliated the side-valve Harleys on the track and on the street. Upgrades to the Model K didn't help; Harley finally relented and introduced a new overhead-valve middleweight for the 1957 model year. Dubbed the Sportster, it was everything the Model K was not. More importantly, it was faster than the British competition. Thus began the Sportster's sixty-year reign. Harley-Davidson Sportster: Sixty Years tells the complete Sportster story. Noted Sportster expert Allen Girdler covers all the bikes--the XLCH, Caf_ Racer, XR1000, XLX, 883, Iron, Forty-Eight, Seventy-Two, and Nightster--that have made the Sportster one of the most iconic motorcycles on earth.

The mortal danger of nuclear weapons is unique in its terrifying potential for devastation on an unprecedented and unimaginable scale. In this book, Sidney D. Drell and James E. Goodby—each with more than twenty years' experience in national security issues both in public and private capacities—review the main policy issues surrounding nonproliferation of nuclear weapons. They address the specific actions that the community of nations—with American leadership—should take to confront and turn back the nuclear danger that imperils humanity. The nuclear genie, say the authors, cannot be put back in the bottle. Our most urgent task as a nation today is to successfully manage, contain, and reduce the grave danger of nuclear weapons—whether in the hands of adversaries or friendly states. This book hopes to stimulate active public dialogue on this important subject.
