Trump's style, mindset, and every action, made up of over one hundred interviews with his closest associates and adversaries over the last 15 years. To his critics, Donald Trump is an impulsive, undisciplined crackpot who accidentally lucked into the presidency. But in The Method to the Madness, reporters Allen

Salkin and Aaron Short reveal that nothing could be further from the truth. This objective, nonpartisan oral history shows that Trump had carefully planned his bid for the presidency since he launched what many considered to be a joke candidacy in 1999. Between 2000 and 2015, when he announced his candidacy in the lobby of

Trump Tower, he was able to identify an unserved political constituency, hone a persuasive message that appealed to their needs, and deliver it effectively, despite intense media opposition. Through candid conversations with more than 100 subjects close to the President, Salkin and Short make the case that Donald Trump's

ostensibly erratic approach to politics is consistent with his carefully honed personal and professional style of information gathering, opinion seed-planting, and conclusion sharing. His business, media, and political dealings from this era serve as a guide for understanding the man, his mindset, and

his every action. The Method to the Madness is an accessible and unbiased oral history that brings readers into the private rooms where decisions are made, confidences are broken, strong words fly, and not all eye-witnesses see the same scene in quite the same way. Full of scoops both large and small, this is the

first book to bring Trump, the politician,  
into focus.

A fresh, inspiring guide to writing fiction.

Madness as Methodology begins with the

following quotation from Deleuze and Guattari, "Madness need not be all breakdown. It may also be breakthrough." This quotation firmly expresses the book's intention to provide readers with radical and innovative approaches to methodology and research in the arts, humanities and education practices. It conceptualises

madness, not as a condition of an individual or particular being, but rather as a process that does things differently in terms of creativity and world making.

Through a posthuman theorising as practice, the book emphasises forms of becoming and differentiation that sees all bodies, human and nonhuman, as acting in

constant, fluid, relational play. The book offers a means of breaking through and challenging the constraints and limitations of Positivist approaches to established research practice. Therefore, experimentation, concept making as event and a going off the rails are offered as necessary means of inquiry into worlds

that are considered to be always not yet known. Rather than using a linear chapter structure, the book is constructed around Deleuze and Guattari's use of an assemblage of plateaus, providing the reader with a freedom of movement via multiple entry and exit points to the text. These plateaus are processually

Therefore, as well as offering a challenge to the constraining rigours of conventional research practices, these plateaus engage with topics to do with posthuman thinking, relationality, affect theory, collaboration, subjectivity,

In the past five years Israel has mounted three major assaults on the 1.8 million Palestinians trapped behind its blockade of the Gaza Strip. Taken together, Operation Cast Lead (2008-9), Operation Pillar of

Defense (2012), and Operation Protective Edge (2014), have resulted in the deaths of some 3,700 Palestinians. Meanwhile, a total of 90 Israelis were killed in the invasions. On the face of it, this succession of vastly disproportionate attacks has often seemed frenzied and pathological. Senior Israeli politicians have not discouraged

such perceptions, indeed they have actively encouraged them. After the 2008-9 assault Israel's then-foreign minister, Tzipi Livni, boasted, "Israel demonstrated real hooliganism during the course of the recent operation, which I demanded." However, as Norman G. Finkelstein sets out in this concise,

paradigm-shifting new book, a closer examination of Israel's motives reveals a state whose repeated recourse to savage war is far from irrational. Rather, Israel's attacks have been designed to sabotage the possibility of a compromise peace with the Palestinians, even on terms that are favorable to it. Looking also at

machinations around the 2009 UN sponsored Goldstone report and Turkey's forlorn attempt to seek redress in the UN for the killing of its citizens in the 2010 attack on the Gaza freedom flotilla, Finkelstein documents how Israel has repeatedly eluded accountability for what are now widely recognized as war crimes.
