People with autism may appear to daydream constantly or be unaware of people around them. Most children with autism prefer

# Access PDF The Neuroscience Of Autism

to play by themselves, and treat other people like furniture. The major symptoms of autism include: Communication Problems: Many people with autism are uncommunicative - they will not speak, gesture, or make facial expressions. When

# Access PDF The Neuroscience Of Autism

they do speak, the speech may be in a sing-song pattern or monotone (no variation in pitch, like playing a single note on an instrument).
